

IC[®] 5e UTP SOLID MODULAR CORDS - US

Siemon's Category 5e IC solid conductor modular cords are designed for use in Category 5e applications requiring a consolidation point (CP) or cross-connect (as an equipment cord). The cords are 100% factory transmission tested. These cords are available in Plenum and Riser jacket and can be ordered single-ended for direct terminations or double-ended for extended length direct connections.

Double and single-end versions available both in T568A and T568B wiring schemes

All Siemon factory assembled cords are 100% transmission tested

Slide on strain relief boots feature a latch guard to protect plug latch from snagging when pulling cords through pathways or cable managers

Plug geometry meets IEC 60603-7, and TIA 1096-A specifications for modular plugs

Plenum rated cable assemblies are compliant with UL2043 and are appropriate for use in air-handling spaces

Modular plugs provide long-term resistance to corrosion from humidity, extreme temperatures, and airborne contaminants

Non-Booted version also available

Strain and bend relief provides improved plug-to-cable retention and maximum performance by preventing pair deformation, as caused by mechanical strain
