

RG6C Termination Instructions

1 Cut coax cable end square

2 Position cable in cutting tool and rotate tool until cable jacket is easily removed.

Note: If braid or center conductor is scored or cut re-prepare cable.

3 Properly prepared cable 1/4" - 1/4".

4 Fold back braid. Ensure center conductor is straight and clean. No braid should touch the center conductor.

Note: Score and remove outer foil on Tri and Quad shielded cable

5 Position connector.

6 Sleeve can be detached to aid in insertion of Tri and Quad cable.

7 Push connector on cable until it bottoms out. Dielectric should be flush with floor of connector as shown.

8 Insert prepared assembly into tool as shown.

9 Terminate connector by squeezing handle until tool is fully compressed.

10 Finished assembly.

To assist safe installations, comply with the following:

- A. Use caution when installing or modifying telecommunications circuits.
- B. Never touch uninsulated wire terminals unless the circuit has been disconnected.
- C. Never install this device in a wet location.
- D. Never install wiring during a lightning storm.
